

# black hole bistro

# sample menu

The Black Hole Bistro predominantly nourishes the Institute's scientists and visiting researchers on a daily basis. We have welcomed many of the world's greatest scientific minds to our tables.

The Bistro, located on the fourth floor of the Institute, is occasionally open to limited numbers of the general public and only in conjunction with specific, ticketed events involving educational and cultural outreach activities. During such occasions, cuisine may be specially prepared to complement the event.
